

## DRIVE

- Compact cutter with tractor for pipes DN 150-400
- Integrated colour camera with LED lighting
- Electric drive carriage with rotary milling arm
- Dimensions approx. Length 1150 x Width 190 x Height 175 mm.
- Weight approx. 21 kg

## DRIVE Plus

- Powerful cutter with tractor for pipes DN 150-600
- The device can be equipped with two air motors of different sizes
- High degree of flexibility
- Dimensions approx. Length 1070 x Width 190 x Height 175 mm.
- Weight approx. 35 kg

# Milling Robots

## TURBO 3

- Powerful main sewer robotic cutter for DN 200-600
- The device is driven by a powerful pneumatic motor. Can be combined with the IMS MULTISAN renovation system
- Integrated colour camera with LED lighting, reversing sensor and tilt sensor
- Dimensions approx. Length 1100 x Width 170 x Height 200 mm.
- Weight approx. 70 kg

## TURBO 4

- Newest generation for mainline sewers DN 200-800 and ideal for opening of laterals after CIPP rehabilitation.
- The powerful pneumatic motor ensures the removal of the hardest deposits.
- Adjustable camera and powerful headlights ensure efficient work in main sewers.
- Dimensions approx. Length 1100 x Width 170 x Height 200 mm.
- Weight approx. 70 kg
